
Example DAC4AutoML Submission for AutoML 2022

Author 1¹

¹Institution 1

Please describe your submission here (roughly 1-2 pages, references not counted). We would like you to cover following points:

- Description of your method, including your motivation, intuitions and assumptions behind it.
- Limitations: What are possible limitations of your work?
- Reproducibility: Do you provide code to easily reproduce your method? What amount of compute and what type of resources did you use?
- Hyperparameters: Does your method introduce hyperparameters? If yes, (how) are they tuned?
